SESSION DESCRIPTION

Sample post-game analysis report prepared for stakeholder review. Data shown is illustrative and does not represent a live exercise.

Table Of Contents

1. Executive Summary

Narrative overview of session scale with headline indicators and per-team activity.

2. Session Activity Timeline

Graphic time axis of session activity, with colour-coded dots for each activity type grouped into per-team lanes.

3. Session Snapshot

Session identity, runtime state, declared configuration, and archive-level metrics.

4. Participants And Seat Activity

De-identified participant roster, seat timing, and derived engagement metrics.

5. Event Log Chronology

Ordered event stream with actor, entity, move, state change, and payload summary.

6. State Transition Ledger

Lifecycle transitions reconstructed for actions, proposals, responses, and RFIs.

7. Decision Lineage

Trace rows linking submitted artifacts to review, communications, RFIs, and event evidence.

8. Research Utility Layers

Derived outcome taxonomy, training rubric evidence, network metrics, and turning-point flags.

9. Draft And Submission History

Draft revision path, wizard progress, and time-to-submit evidence.

10. Actions And Adjudications

Detailed Blue-team action records paired with White Cell rulings and effects.

11. Proposals: Content And Review

Proposal-team records, routing intent, review rationale, and recipient outcomes.

12. Move Responses

Red-team move-response records, posture, rationale, and submitted detail.

13. Requests For Information

Question-and-answer exchanges between team scribes and White Cell.

14. Communications And Interaction Summary

Cross-team communication flows, response latency, and interaction counts.

15. Session Recordings

Operator-controlled audio artifact references captured by the Session Recorder plugin.

16. Notes And Observation Capture

Structured note summary plus optional appendix of note content.

17. Data Quality And Export Integrity

Observed disconnects/gaps and the integrity fields used to verify the export.

SECTION 01

Executive Summary

A narrative overview of session scale and the headline indicators that frame the detailed evidence in the sections that follow.

This post-game analysis reconstructs Fractured Order — Demonstration Exercise, captured in Research mode. The session spans 46m across 2 move(s), with 9 active participant seat(s) generating 19 logged events. Teams submitted 4 action(s) (1 adjudicated) and 1 proposal(s) (1 forwarded), and raised 2 request(s) for information.

SECTION 02

Session Activity Timeline

A graphic reconstruction of what happened during the session. Each dot is one captured activity placed along a shared time axis; colour encodes the activity type and each row groups activity by team, so density, sequencing, and per-team load can be read at a glance.

This timeline plots 19 captured activities across 5 active lane(s) over a 46m span. Each dot is one activity positioned by time of occurrence; colour encodes the activity type and each row groups activity by team. Dashed vertical guides mark observed move boundaries.

SECTION 03

Session Snapshot

Session identity, runtime state, declared configuration, and archive-level metrics used for post-game analysis.
